

Vaibhav Kashyap – 2015111

Umesh – 2015109

Umesh has done the gui code.

Vaibhav has done all the internal functioning part of project.

Entity Resolution : - >

I have first check by comparing the name of the authors with given string by user converting both the strings in lowercase if they match they are same.

Also if the first character of the string entered by user matches with the authors name in xml file then it checks for the sir name if both are equal then the names are same.
